WORK EXPERIENCE

2020 **Junior QA Tester**
"WAA Lab", Kyiv, Ukraine, March 2020 – current
As a part of the RTS-RPG game creation team I work as a manual testing engineer and my duties are:
- Writing and executing test cases and check lists
- Creating bug reports
- Creating E2E test cases for different game situations
- Performing API testing

2014 **System Administrator**
"LLC Medharant", Kyiv, Ukraine, October 2014 – February 2020
What I did:
- Redesigned the corporate website in Joomla to make it easy to add and change information.
- Updated old computers in the clinic to support modern, specialized equipment and software.
- Helped implement a software package for recording and maintaining patient treatment logs and trained staff to use it.
- Reported issues and bugs to the technical supports.
- Organized the possibility of remote user support with home PC and via a smartphone for instantly issue resolving.

2012 **WEB-designer**
"VOO "VPPI"", Kyiv, Ukraine, November 2012 – August 2014
Duties:
- Designed and created corporate website
- Information, processing and placement on the website
- Promotional materials design development and adaptation
